🧩 Summary

Full-Stack JavaScript Developer experienced in building modern web applications using React, Next.js, Node.js, Express.js and NestJS. Proficient in developing responsive front-end interfaces, designing RESTful APIs, and building scalable backend architectures. Focused on performance, maintainability, and delivering excellent user experiences.

🧠 Skills

Languages
HTML, CSS, JavaScript, TypeScript, Node.js

CSS Frameworks
Tailwind, Bootstrap

Version Control
Git, Github

Frontend Frameworks
React, Next.js

UI Libraries
Material UI, Chakra UI, Shad CN

Backend Services
Firebase, Supabase

Mobile Development
React Native, Expo

Design Tools
Figma

Backend Frameworks
Express.js, NestJS

🎓 Education

BSc in Computer Science, University of Ibadan
- Strong foundation in algorithms, data structures, and software development.
- Hands-on experience with web technologies: HTML, CSS, JavaScript, React.js, and databases.
- Led teams in course projects.

💼 Professional Experience

Frontend Developer, OpenHealth ⬈   04/2025 – 06/2025
- Migrated the frontend codebase from Create React App (CRA) to Vite for faster builds and improved developer experience.
- Contributed to the development and revamp of OpenHealth's landing page and user dashboard.
- Built and integrated a responsive admin dashboard with real-time data using React.js and Tailwind CSS.
- Implemented a chatbot interface to improve user interaction and accessibility.
- Advised the team on UI/UX best practices and frontend security approaches to better protect user data.

Frontend Developer, Freelance   10/2024 – 12/2024
- Developed custom web applications with React.js, Tailwind CSS, and JavaScript.
- Collaborated with clients, backend developers, and product designers to deliver tailored solutions.
- Managed full project lifecycle, from design to deployment and support.
- Maintained clear communication, providing updates and incorporating feedback.
- Demonstrated problem-solving and adaptability to meet client requirements and deadlines.

📁 Projects

LingoPulse, ⬈, AI-Powered Real-time Translation Chat Platform
- Developed a high-performance React & Tailwind platform featuring AI-driven real-time translation and instant voice-to-text transcription to eliminate global language barriers.
- Engineered a robust Firebase backend for secure authentication and real-time sync of professional chat features, including read receipts, message reactions, and dynamic room administration.

Terminally AI ⬈, Intelligent Terminal Assistant
- Architected a high-performance CLI using Node.js and Gemini AI to translate natural language prompts into context-aware, executable shell commands.
- Engineered a multi-layered safety protocol featuring a Risk Engine and Visual Simulation to predict command impact (files, disk, processes) before execution.
- Implemented a smart diagnosis system that captures shell errors and leverages AI to provide instant one-line fixes and detailed recovery explanations.

FutureTech ⬈, Modern Blogging Platform
- Developed a feature-rich blog platform using Next.js and Supabase for content management and user authentication.
- Implemented a clean and responsive UI with Tailwind CSS for optimal user experience across devices.
- Integrated dynamic content fetching, allowing users to read and post articles seamlessly.

🎖 Certificates

Frontend Developer (React) – HackerRank Certified ⬈
